**Subject:** [EXTERNAL] Housing for Venezuelan Refugees

I am a DPS teacher working at a school in the [REDACTED] and we have received over 60 students from Venezuela. I have three Venezuelan students in my class, and I am doing my very best to support these children and their families as they get settled. We have turned our auditorium stage into a donation site where they can find clothing for their families. Right now the families are in desperate need of housing, and while I can help them with clothing and food, I can't help them find affordable housing. Do you have resources for affordable housing? Knowing that my three year old students are sleeping on the **streets** makes it hard for me to sleep at night. I would appreciate any resources you have.

Sincerely,

[REDACTED]
