Good morning,

This is the information we discussed during the staff meeting yesterday. Please work with [REDACTED] so that we can get some female students to apply!

Subject: Summer Coding Class

Hey [REDACTED],

I was wondering if you could forward this along to staff? It is a coding class being taught virtually this summer. Students who are interested have to be "female-identifying and non-binary individuals ages 13-18 who feel comfortable learning in a female-identifying environment." If teachers wanted to

forward me a list of students who are interested in this, I would be glad to help the students apply for the program via Zoom calls. Applications are due in just under a month and I want to help give some of our ladies access to STEM opportunities outside of school.

Thanks!

Best,
