Steve and Scott,

I have few issues going on that I think it is important for both of you to be aware of – They are FYI only as I think they may reach your desk -- Fabio

personnel

- **Thomas Jefferson** - Here is a summary of some MOUs between the Partnership for TJ and some private organizations. We did not know Evan authorized a High School Technology Institute and a partnership with AMESON and Tsinghua University. Good programs and they need to follow certain protocols to make sure is all OK.

Summer School Technology Institute

1. Summer enrichment program offered for the first time in 2017
2. Open to any student in FCPS or other VA counties
3. TJ teachers were compensated by FCPS for teaching at the FCPS standard summer rate
4. TJPF signed an independent contract with the teachers offering 40% salary above the standard rate in exchange for "deliverables" that included course descriptions, syllabi, and various course materials
5. FCPS did not have the opportunity to evaluate the contracts regarding compensation packages and services being rendered
6. Teachers and TJPF had appropriate intents to create outreach opportunities for students

AMESON and Tsinghua University

7. Four-year contracts were initiated between TJPF and these respective independent organizations in 2014
8. Note- no representative from TJ or FCPS signed the contracts
9. Contracts generate revenue for TJPF
10. Contracts obligate TJHSST staff to host Chinese visitors multiple times per year
11. Visits include meetings with staff, sharing curriculum ideas, advising facilities planning for STEM schools
12. Contracts obligate TJHSST staff to international travel, all expenses paid
13. FCPS did not have the opportunity to evaluate the contracts regarding TJ services and travel
14. TJPF and TJ leadership had mutual interests for generating revenue that would help the TJ community and create global connections

Fabio E. Zuluaga, Ed.D
