

**WHEREAS** the district implemented multi-level classes at Newton South with no metric for success and no collection of data, no evidence has been presented that the implementation of multi-level classes at Newton South has improved outcomes for any students,

**WHEREAS** two years of data collected by the Newton South Faculty Council confirm that educators feel unsupported in teaching multilevel classes, are unclear on how these classes benefit students, and cite them as an urgent problem to be solved,

**WHEREAS** these classes and the lack of support around teaching them have been a major source of stress and low morale among educators,

**We, the undersigned, petition the SUPERINTENDENT OF SCHOOLS, the DISTRICT'S MATHEMATICS CURRICULUM AND PROGRAM REVIEW COMMITTEE, and the NEWTON SCHOOL COMMITTEE to:**

**Roll back multi-level classes** in, at least, the Science, Mathematics, and World Languages departments beginning with the 2025-26 school year,

**Form a joint committee** consisting of educators, district leaders, students, and families to identify which problems multi-level classes were intended to solve, identify possible solutions, then formulate opt-in pilot programs to be deployed during the 2025-26 school year.
