QUESTION 9:

There has been significant discussion in the news recently about student loan debt. Some people argue that the current student debt is slowing the national economy and preventing many Americans from achieving milestones, such as getting married, buying a house or saving for retirement. Other people argue that student debt forgiveness is an abuse of the loan system as people must be accountable for their personal choices and should not be a burden on taxpayers who would ultimately pay for the debt forgiveness. Which statement comes closer to your opinion?

QUESTION 10:

An "early decision" program is a binding admission arrangement between a potential freshman and a specific college. When an early decision agreement is signed, the applying freshman understands that, upon acceptance, he or she will withdraw from any other college applications and enroll in that specific college regardless of the financial aid package offered. Knowing this, to what extent do you agree or disagree with the following statement:

Early Decision policies tend to advantage students who are able to pay full tuition?
